

Plug-in Power Socket

with timer

The compact plug-in socket from SCHWAIGER® is designed for the connection to a standard household 230 V socket. Thanks to the built-in timer, you can determine the operating time of your electrical appliances or lighting independently and easily by yourself. The automatic switch-off function ensures that

you can always focus on more important things than, e.g. when to switch off the light. Moreover, you will avoid excessive energy consumption of your connected devices with this practical adapter plug while protecting your wallet and the environment at the same time.
