

## 4in1 LED Emergency Light with motion sensor

The 4in1 LED emergency light from SCHWAIGER® can be used as a practical flashlight, as light in an emergency or as a night light with motion detector and brightness sensor. Once plugged into the socket, the multifunctional light is always ready for use

thanks to the automatic induction charging and it won't ever leave you in the dark again. In the event of a power failure, the light will switch on automatically and helps you to orientate yourself immediately.
