3in1 LED Emergency Flashlight

The 3in1 LED emergency lamp from SCHWAIGER® can be used as a practical flashlight in everyday life, as light in an emergency or as a night light with brightness sensor. Once plugged into the socket, the multifunctional light is always ready for use thanks to the automatic induction charging

and won't ever leave you standing in the dark again. In the event of a power failure, the light will switch on automatically and helps you to find your way around immediately. Thus you'll always have a working flashlight at home when it matters most.
