## 4in1 LED Emergency Light

with motion sensor

The 4in1 LED emergency light from SCHWAIGER® can be used as a practical flashlight, a handy work light, as light in an emergency or as a night light with motion detector. Once plugged into the socket, the multi-functional light is always ready for use thanks to the automatic induction charging

and it won't ever leave you standing in the dark again. In the event of a power failure, the light will switch on automatically and helps you to find your way around immediately. Thus you'll always have a working lamp in the house that reliably provides the right lighting.

## FEATURES (661637)

- 4in1 emergency Light with induction charging function by plugging into a wall socket
- integrated 500 mAh lithium-ion battery for mobile power supply
- can be used as a handy lamp with a large, illuminated area
- reliable detection of movement thanks to PIR sensor with large detection range
- built-in LED lamp with flashlight function
- emergency function for automatic switch-on during power failure
- nightlight function with motion sensor
- quick and easy switching of modes
- wireless induction charging function by inserting the charging plate
- scope of delivery: 4in1 LED emergency light, charger, instruction manual

## TECHNICAL DATA

Power supply	220 - 240 V AC , 50 Hz
Capacity of battery	500 mAh
Battery type	lithium ion (rechargeable)
LEDs	head light 5x LED front light 6x LED
Luminous flux	60 Lm (Head light) 35 Lm (front light)
Range	sensor: 4 m
Coverage angle (PIR)	100 °
Lebensdauer (LED)	30000 h
Run time	continuous operation 1.5 h

Charging time	6-7 h
Material of product	ABS polycarbonate
Colour	white
Weight (set)	146 g
Dimensions (width)	70 mm
Dimensions (height)	164 mm
Dimensions (depth)	72 mm
Model number	NFL60
Packaging	carton
