

Padlock with fingerprint

version with steel shackle + emergency key

Our SCHWAIGER® fingerprint padlock with steel shackle and emergency key is perfect for securely locking e.g. doors, chests, lockers or tool sheds. The lock is unlocked via biometric fingerprint or, alternatively with a classical key. Up to 10 different fingerprints can be stored.

The lock's steel body in addition with a special zinc alloy and IP65 certification make it the ideal companion in any situation. With one battery charge, the lock can be unlocked up to 1800 times. The lock can be conveniently charged via USB Type-C.
