

Steel rope sheathed with crimped loops

Our SCHWAIGER[®] steel rope is galvanized as well as plastic-coated and is assigned to rope class 6x7. This involves 6 strands with 7 wires each. The high number of individual wires provides both good flexibility and increased stability. The steel ropes are made

of a high-quality industrial steel and are therefore ideal for securing goods, for camping or for securing e.g. baby carriages, bicycles, garden or catering furniture.

FEATURES (716498)

- made of high quality industrial steel
- galvanized and PVC plastic coated
- PVC sheathing protects your objects against abrasions and scratches
- perfect, versatile anti-theft protection
- outer diameter 6 mm (4 mm steel rope + 2 mm PVC cable sheath)
- good flexibility thanks to high number of individual wires
- loops crimped on both sides
- tested according to DIN13414-1 for sling ropes
- extremely high tensile strength with 1960 N/mm²
- made in Germany
- scope of delivery: steel rope

TECHNICAL DATA

Material of product	stainless steel PVC
Minimum breaking force	10.41 kN
Tensile strength	1,960 N/mm ²
Rope class	6x7 (6 strands of 7 wires)
Colour	silver
Dimensions (length)	5.0 m
Weight	390 g
Application areas	article surveillance/strollers/garden furniture/bicycles/catering furniture/camping
Packaging	paper strip
