

AUDIO connection cable

jack plug (3.5 mm) > jack plug (3.5 mm)

This AINSTEIN jack cable provides the connection between devices with a jack connection such as mobile devices or audio/video receivers. The oxygen-free copper inner conductor takes over the exact signal line. The cable's high shielding ensures interference-free signal transmission and the gold-plated

contacts provide a high signal stability. The processed plugs are made of particularly durable metal. The kink protection ensures optimal strain relief as well as a form-fitting connection. In addition to that the flexible fabric sleeve prevents cable breakage.

FEATURES (AIAU1025 413)

- connection cable for connecting two audio devices
- gold-plated pins offer best-possible conductivity, minimum transmission resistance and high protection against corrosion
- resilient and flexible textile sheath
- plug with kink protection

TECHNICAL DATA

| | |
|---------------------|---|
| Connections | 2x 3.5 mm jack plug (stereo) |
| Plugs | metal gold-plated pin |
| Material of product | textile |
| Cable length | 2,5 m |
| Inner conductor | OFC-Cu (copper with low oxygen content) |
| Colour | space gray |
| Packaging | carton |
