

AUDIO Extension Cable

jack plug (3.5 mm) > jack plug socket (3.5 mm)

This AINSTEIN jack cable extends the connection between devices with a jack connection such as mobile devices or audio/video receivers. The oxygen-free copper inner conductor takes over the exact signal line. The cable's high shielding ensures interference-free signal transmission and the gold-plated

contacts provide a high signal stability. The processed plugs are made of particularly durable metal. The kink protection ensures optimal strain relief as well as a form-fitting connection. In addition to that the flexible fabric sleeve prevents cable breakage.

FEATURES (AIAU3050 413)

- for extending a 3.5 mm jack cable
- gold-plated pins offer best-possible conductivity, minimum transmission resistance and high protection against corrosion
- also suitable for all audio devices equipped with a 3.5 mm jack plug socket, e.g. CD player, MP3 player, tablet, smart phone, car radio
- resilient and flexible textile sheath
- plug with kink protection

TECHNICAL DATA

Connections	1 x 3.5 mm jack plug (stereo) 1 x 3.5 mm jack plug socket (stereo)
Plugs	metal gold-plated pin
Material of product	textile
Cable length	5 m
Inner conductor	OFC-Cu (copper with low oxygen content)
Colour	space gray
Packaging	carton
