

AUDIO Adapter Cable

jack plug (3,5 mm) > chinch plug

This AINSTEIN adapter cable is used for connecting devices with CINCH connector to jack such as portable media players, a stereo system or headphones. The oxygen-free copper inner conductor takes over the exact signal line. The cable's high shielding ensures interference-free signal transmission and the

gold-plated contacts provide a high signal stability. The processed plugs are made of particularly durable metal. The kink protection ensures optimal strain relief as well as a form-fitting connection. In addition to that the flexible fabric sleeve prevents cable breakage.

FEATURES (AIAU5025 413)

- cable for connecting a portable audio device or a computer sound card to a hifi system
- gold-plated pins offer best-possible conductivity, minimum transmission resistance and high protection against corrosion
- resilient and flexible textile sheath
- plug with kink protection
- suitable for connecting a subwoofer (2 Cinch IN) to an amplifier (1 Cinch OUT)

TECHNICAL DATA

Connections	2x CINCH plug 1x 3.5 mm jack plug (stereo)
Plugs	metal gold-plated pin
Material of product	textile
Cable length	2.5 m
Inner conductor	OFC-Cu (copper with low oxygen content)
Colour	space gray
Packaging	carton
