The Network Innovators

dLAN® 500 WiFi

Finally, WiFi anywhere.

Revolutionarily easy. WLAN expansion adapter. Best possible reception for smart phone and tablet. For the connection of the dLAN® 500 WiFi, devolo uses the household electrical wiring. This ensures that the full bandwidth of the DSL connection is available

at any power outlet the dLAN® 500 WiFi is plugged into. This is quite unlike a WLAN repeater: A repeater only transfers an already weak signal which results in a still bad WLAN connection.

ARTICLE INFORMATION

Article Nr AV501W
EAN 4250059690769

Last updated: 28.03.2016

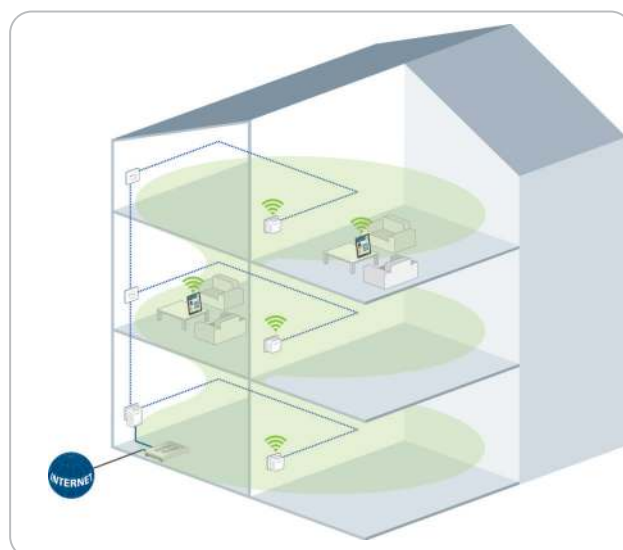

FEATURES (AV501W)

- LED display for operation and active WLAN / dLAN® connectivity
- ON/OFF switch for WLAN operation
- low energy consumption (Power Save Technology)
- steady internet services for all internet-compatible devices
- Plug&Play - easy establishment of WLAN zones (WLAN Access Points) within the dLAN® home network supported by the WLAN high-speed standard "802.11n"
