

LED camping lamp with campfire effect

This battery-powered SCHWAIGER® LED camping light with its powerful COB (chip-on-board) LEDs always provides the right lighting - whether in the garden at home or when camping on the road. Thanks to its compact dimensions, the lamp can easily be stowed away in your luggage and is always with you.

Magnets and hooks on the underside make it easy to hang the lamp almost anywhere. And on top of that, with the optical flame effect you can create a cosy campfire atmosphere at any time, even in places where an open fire is not permitted.
