

## devolo Home Control Starter Pack

Now everyone can have a Smart Home.

devolo Home Control Central Unit - The devolo Home Control Central Unit discreetly ensures that all Home Control components of your smart home work with each other without a hitch.

devolo Home Control Door/Window Contact – The devolo Home Control Door/Window Contact reliably detects open doors, windows or drawers and sounds the alarm if something isn't right, or automatically switches the lights

on and off and additionally controls your radiators.

devolo Home Control Smart Metering Plug – Bring a bit of extra convenience into the home with the Smart Metering Plug. You also have an overview of the power consumption of the connected devices and can quickly identify "energy hogs" using the measurement function of the electrical socket.
