

## devolo Home Control Humidity Sensor

Always the perfect room climate

The devolo Home Control Humidity Sensor is a digital thermo hygrometer which constantly monitors humidity and temperature. The device reliably detects excessive or insufficient humidity and immediately sends notifications. In addition, the thermo hygrometer collects all

data measured and carries out an evaluation on temperature and humidity every three days. This allows you to detect unhealthy room climate early so that you can prevent the growth of mould.

## FEATURES (DEV9663)

- Reliably detects excessive or insufficient humidity and temperature and sends notifications via text message, e-mail and app (push notification)
- Ensures a healthy room climate and prevents mould growth.
- Rugged and compact. Unobtrusive installation throughout the home and beyond (e.g. garage, shed, etc.).
- Versatile installation via adhesive film or screws (both in the scope of delivery).
- Long range and long battery life (up to 5 years).
- Can be combined at any time with other devolo Home Control components.
- Future-proof thanks to standardised Z-Wave® wireless technology.
- content: devolo Home Control Humidity Sensor with battery, mounting accessories, installation manual

## TECHNICAL DATA

Integrated protocols	Z-Wave
Frequency range	868,42 MHz
Range	up to 25 m indoor up to 100 m outdoor
Point of use	indoor use
Operating temperature	-10° - 40 °C
Ambient conditions	0 - 85 % humidity (non-condensing)
Display	LED
Button	1
Battery type	CR123A

Humidity measurement	0 - 85 %
Temperature measurement	-10° - 40° °C
Operating systems	from Windows® 7/Linux® (Ubuntu)/Mac OS® X
Certifications	CE Class B (EU, CH, NO)
Dimensions (width)	28 mm
Dimensions (height)	85 mm
Dimensions (depth)	23 mm
Guarantee	3 years manufacturer's guarantee
Packaging	carton
