TeleFairy 3.0 - Quad Core Media Player

with ad blocker

The TeleFairy offers a very nice possibility with DLNA - home networking. And while a lot of manufacturers claim to offer such a possibility, DLNA which recognises many formats on a number of terminal devices is still rare to find. Here you can really easily bring videos from

your home PC on the TV or the tablet or vice-versa. All devices in the WiFi can be joined in for videos, live-streams, pictures and music.
