

WiFi Stereo Loudspeaker (30 W)

for integration into the Home Automation network

This SCHWAIGER® three-way active loudspeaker can communicate with the Gateway via the home network. As soon as it is integrated into the Home Automation (HA) network, it is both an internet radio and an alarm. In addition, text messages and audio

streams (VOCO HD App) can be played with this loudspeaker. Once integrated into the HA network, this loudspeaker can also be used to set up scenarios in combination with other components of the Home Automation series.
