HDMI™ via Power Line Set

This SCHWAIGER[®] HDMI™ PLC set consists of a transmitter and a receiver. It allows for parallel distribution of signals of an HDMI™ source, e.g. satellite receiver or BluRay player, to a second TV in the house. A special feature of this article is the fact that it transfers signals

in full 1080p HD resolution via the power network . The transmitter and the receiver can easily be operated with the Plug and Play function.
