

Remote Control

for the SCHWAIGER "Green Guard" system

This SCHWAIGER® remote control is the perfect addition to the Green Guard system. The system is conveniently activated and deactivated via the remote control instead of via entering a PIN code on the centre unit for example. The remote control can also be used

to activate an immediate panic alarm in order to frighten off intruders. This product only works in combination with a centre unit (e.g. HG1000 or HG2000) and cannot be used individually.
