

Mono Bluetooth Headset

including charging station

The customizable SCHWAIGER® Bluetooth® headset is designed for easy communication on the computer. It features both a comfortable on-ear headset and a flexible microphone for simultaneous listening and speaking. Since one ear always remains free, you are never isolated from the outside world

and remain responsive at all times, even with the headset on. On top of that, thanks to Bluetooth®, there's no more cable clutter at the workplace or when you get up in between. The integrated battery with long runtime can also be easily recharged on the accompanying charging station.
