Modem connection cable for Self Install

IEC connector > IEC jack

This SCHWAIGER® TV connection cable for Self-Install is designed for higher requirements for high-resolution picture and sound transmissions. The TV connection cable for Self-Install is ideally suited for the connection between TV and multimedia sockets or between receiver

and antenna sockets. The cable offers the highest possible protection against electromagnetic interference and radio interference of all kinds due to the very high shielding (class A + 10dB).

TV Anschlusskabel für Kabel Fernsehen / TV Connection cable for cable TV

Variante / Variant 1

Variante / Variant 2

FEATURES (KDSKI30 532)

- receiver connection cable for connecting customer terminals, IEC plug to IEC coupling
- plug-in coupling (IEC female) designed with closed (unslotted) plug cylinder and internal spring cage
- type according to specification and approved for use in cable networks of Vodafone Kabel Deutschland GmbH (type KDG 1 TS 152)
- shielded three times for additional protection against electromagnetic interference
- shielding effect according to class A (+10 dB) DIN EN 60966-2-5
- scope of delivery: 1x TV connection cable

TECHNICAL DATA

Quality	ULTIMATE
Connections	1x IEC connector 1x IEC jack with inner ring
Cable length	3 m
Impedance	75 Ohm
Plugs	metal with plastic nickel-plated contact
Cable design	1.08 mm (inner conductor) 3.55 mm (dielectric) 6 mm (sheath)
Shielding	shielded 3 times
Shielding value	class A + 10 dB
Shielding material	aluminium composite film/112-wire aluminium braid/aluminium composite film
Inner conductor	CCS
Colour	white
Packaging	Box04 B
