SAT/Antenna Connection Cable (75 dB)

F connector > IEC connector

This SCHWAIGER® SAT connection cable can be used for connecting the satellite receiver to the SAT socket or to the antenna socket. This cable is shielded twice and, thus, has low

susceptibility for electromagnetic interference. The cable has a shielding value of 75 dB.

FEATURES (KVCK161 532)

- shielded twice for low susceptibility to electromagnetic interference
- solid nickel-plated internal PIN
- solid connector, moulded on both sides

TECHNICAL DATA

quality	* Standard
Connections	1x F connector 1x IEC connector
Form of cable	round
Impedance	75 Ohm
Plugs	metal
Cable design	0.5 mm (inner conductor) 2.8 mm (dielectric) 5 mm (sheath)
Shielding value	> 75 dB
Shielding	shielded twice
Shielding material	aluminium composite film/64-wire braid
Inner conductor	CCS
Cable length	1.5 m
Material of product	plastic
Colour	white
packaging	sealed blister SBL03

Last updated: 23.03.2016
