SAT Connection Cable (90 dB)

F connector > IEC jack

This SCHWAIGER® SAT connection cable meets the higher requirements of high resolution audio and video transmission. It is perfect for connecting a satellite receiver to a satellite connector socket with coaxial connection. Thanks to the high shielding value

of 90 dB, the cable offers best-possible protection against electromagnetic interference and radio interference of any kind. The inner conductor, which is made of copper, makes for loss-free signal transmission and, thus, for interference-free reception.

FEATURES (KVCKHQ193 532)

- shielded twice for low susceptibility to electromagnetic interference
- solid, nickel-plated inner pin for secure and repeated connection

TECHNICAL DATA

quality	** Professional
Connections	1x F connector 1x IEC jack
Cable design	1.02 mm (inner conductor) 4.57 mm (dielectric) 6.6 mm (sheath)
Shielding value	90 dB
Shielding	shielded twice
Shielding material	aluminium composite film/64-wire aluminium braid
Cable length	3 m
packaging	sealed blister SBL02

Last updated: 23.03.2016
