SAT Connection Cable (110 dB)

90° Angled F connector > F connector

This SCHWAIGER® SAT connection cable is designed to meet higher requirements of high resolution audio and video transmission. It is particularly suitable for connecting a satellite receiver to a satellite connector socket equipped with an F connection. Due to the very high shielding efficiency of 110 dB, the

cable offers best possible protection against electromagnetic interference and radio interference of any kind. The inner conductor, which is made of copper, allows for loss-free signal transmission which, in turn, makes for interference-free reception.

(KVCWHD100 532)

- particularly suitable for HDTV via satellite
- shielded 4 times to effectively reduce electromagnetic interference
- inner conductor made of copper for good signal transmission
- best-possible conductivity and minimum transmission resistance due to gold-plated contacts
- solid all-metal plugs with cable gland

TECHNICAL DATA

Quality	*** Ultimate
Connections	1x F connector 1x Angled F connector
Colour	transparent (white)
Impedance	75 Ohm
Plugs	metal gold-plated pin
Cable design	1 mm (inner conductor) 3.1 mm (dielectric) 6 mm (sheath)
Shielding	shielded 4 times
Shielding value	110 dB
Shielding material	aluminium composite film/96-wire aluminium braid/aluminium composite film/128-wire aluminium braid
Inner conductor	CU
Cable length	10 m
Packaging	sealed blister SBL05C

Last updated: 24.01.2017
