Antenna Connection Cable (110 dB)

IEC connector > IEC jack, with ferrite core

This SCHWAIGER® IEC connection cable is designed to meet higher requirements of high resolution audio and video transmission. The antenna cable is particularly suitable for connecting a receiver to an antenna socket equipped with a coaxial connection. Due to

the high shielding efficiency of 110 dB, the cable, which has a ferrite core, offers best possible protection against electromagnetic interference and radio interference of any kind. The inner conductor, which is made of copper, makes for interference-free reception.

FEATURES (KVKHD30 031)

- particularly suitable for HDTV via cable TV
- shielded 4 times to effectively reduce electromagnetic interference
- with ferrite core for additional suppression of sheath current interference
- very high shielding efficiency guaranteed
- inner conductor made of copper for good signal transmission
- best possible conductivity and minimum transmission resistance through gold-plated contacts
- solid all-metal plugs with cable gland

TECHNICAL DATA

Connections	1x IEC connector 1x IEC jack
Ferrite core	yes
Impedance	75 Ohm
Plugs	metal
Shielding value	110 dB
Shielding	shielded 4 times
Cable length	3 m
Colour	transparent
packaging	sealed blister SBL05A
