

ANTENNA

## Antenna Connection Cable (75 dB)

angled IEC jack > IEC connector

This SCHWAIGER® antenna connection cable is suitable for antenna and cable TV systems. The angled connector on one end allows for using the cable with devices which are close to the wall. This cable is shielded twice and, thus, is less susceptible to any kind

of signal interference. The cable is used between the antenna socket and a receiver.

(KVKW100 032)

- shielded twice for optimum protection against electromagnetic interference
- 90° angled connector shortens too long cable bendings and prevents the cable from breaking

## TECHNICAL DATA

|                     |  |
|---------------------|--|
| Material of product | plastic                                      |
| Colour              | white  |
| Classification      | connection according to DIN 45325 (IEC169-2) |
| Connections         | 1 x angled IEC jack<br>1 x IEC connector     |
| Form of cable       | round  |
| Impedance           | 75 Ohm                                       |
| Plugs               | moulded                                      |
| Shielding value     | 75 dB  |
| Shielding           | shielded twice                               |
| Cable length        | 10 m   |
| Packaging           | sliding blister 5c                           |
