## Antenna Connection Cable (75 dB)

angled IEC jack > IEC connector

This SCHWAIGER® antenna connection cable is suitable for antenna and cable TV systems. The angled connector on one end allows for using the cable with devices which are close to the wall. This cable is shielded twice and, thus, is less susceptible to any kind

of signal interference. The cable is used between the antenna socket and a receiver.

(KVKW100 532)

- shielded twice for optimum protection against electromagnetic interference
- 90° angled connector shortens too long cable bendings and prevents the cable from breaking

## TECHNICAL DATA

Quality	* Standard
Material of product	plastic
Colour	white
Connections	1x IEC connector 1x angled IEC jack
Impedance	75 Ohm
Plugs	moulded
Cable design	0.5 mm (inner conductor) 2.8 mm (dielectric) 5 mm (sheath)
Shielding value	75 dB
Shielding	shielded twice
Shielding material	aluminium composite film/32-wire aluminium braid
Inner conductor	CCS
Cable length	10 m
Packaging	sealed blister SBL04

Last updated: 24.01.2017
