Antenna Connection Cable (75 dB)

angled IEC jack > IEC connector

This SCHWAIGER® antenna connection cable is suitable for antenna and cable TV systems. The angled connector on one end allows for using the cable with devices which are close to the wall. This cable is shielded twice and, thus, is less susceptible to any kind of signal

interference. The cable is used between the antenna socket and a receiver.

FEATURES (KVKW15S 532)

- shielded twice for low susceptibility to electromagnetic interference
- 90° angled connector shortens too long cable bends and prevents cables from breaking

TECHNICAL DATA

quality	* Standard
Norm/Classification	connection according to DIN 45325 (IEC 169-2)
Connections	1 x angled IEC jack 1 x IEC connector
Impedance	75 Ohm
Plugs	moulded
Cable design	0.5 mm (inner conductor) 2.8 mm (dielectric) 5 mm (sheath)
Shielding value	75 dB
Shielding	shielded twice
Shielding material	aluminium composite film/32-wire braid
Cable length	1.5 m
Material of product	plastic
Colour	white
packaging	sealed blister SBL03
