Antenna Connection Cable (75 dB)

IEC angled jack > IEC connector

This SCHWAIGER® antenna connection cable is suitable for antenna and cable TV systems. The angled connector on one end allows for using the cable with devices which are close to the wall. This cable is shielded twice and, thus, is less susceptible to any kind of signal

interference. The cable is used between the antenna socket and a receiver.

FEATURES (KVKW30 533)

- shielded twice for less electromagnetic signal interference
- 90° angled jack shortens long cable bendings and prevents cables from breaking

TECHNICAL DATA

quality	* Standard
Connections	1x IEC connector 1x 90° angled F jack
Impedance	75 Ohm
Plugs	moulded
Cable design	0.5 mm (inner conductor) 2.8 mm (dielectric) 5 mm (sheath)
Shielding value	75 dB
Shielding	shielded twice
Shielding material	aluminium composite film/32-wire aluminium braid
Inner conductor	CCS
Cable length	3 m
Material of product	plastic
Colour	black
packaging	sealed blister SBL03
