

Antenna Connection Cable (75 dB)

angled IEC jack > IEC connector

This SCHWAIGER® antenna connection cable is suitable for antenna and cable TV systems. The angled connector on one end allows for using the cable with devices which are close to the wall. This cable is shielded twice and, thus, is less susceptible to any kind

of signal interference. The cable is used between the antenna socket and a receiver.

(KVKW50 032)

- shielded twice for optimum protection against electromagnetic interference
- 90° angled connector shortens too long cable bendings and prevents the cable from breaking

TECHNICAL DATA

Material of product	plastic
Colour	white
Classification	connection according to DIN 45325 (IEC169-2)
Connections	1 x angled IEC jack 1 x IEC connector
Form of cable	round
Impedance	75 Ohm
Plugs	moulded
Shielding value	75 dB
Shielding	shielded twice
Cable length	5 m
Packaging	sliding blister 5c

Last updated: 24.01.2017
