## Antenna Connection Cable (110 dB)

IEC Angled jack > IEC plug, with Ferrite Core

This SCHWAIGER® IEC connection cable is designed to meet higher requirements of high resolution audio and video transmission. It is particularly suitable for connecting a receiver to an antenna socket equipped with a IEC connection. Due to the high shielding

efficiency of 110 dB, the cable offers best possible protection against electromagnetic interference and radio interference of any kind. The inner conductor, which is made of copper, makes for interference-free reception.

## FEATURES (KVKWHD50 531)

- particularly suitable for HDTV via cable TV
- shielded 4 times to effectively reduce electromagnetic interference
- with ferrite core for additional suppression of sheath current interference
- inner conductor made of copper for good signal transmission
- best possible conductivity and minimum transmission resistance through gold-plated contacts
- 90° angled jack shortens long cable bendings and prevents cables from breaking
- solid all-metal plugs with cable gland

## TECHNICAL DATA

quality	*** Ultimate
Connections	1x angled IEC jack 1x IEC connector
Ferrite core	yes
Impedance	75 Ohm
Plugs	metal gold-plated pin
Cable design	1 mm (inner conductor) 3.1 mm (dielectric) 6 mm (sheath)
Shielding value	110 dB
Shielding	shielded 4 times
Shielding material	aluminium composite film/96-wire aluminium braid/aluminium composite film/128-wire aluminium braid
Inner conductor	CU
Cable length	5 m
Colour	transparent
packaging	sealed blister SBL05B
