230V USB charger

Our SCHWAIGER® USB charging adapter was designed for the connection to a 230 V socket and is equipped with one USB socket. The charger enables charging of one mobile device (e.g. smartphone, tablet, camera or headphones). Simply use the USB cable of the

device to be charged. Thanks to its gaudy colour, the adapter is a real eye-catcher in every living room and stands out from the monotonous standard colours.
