

LED Sensor Lamp (2 Lamps)

with motion detector and 2 lamps

This SCHWAIGER® sensor lamp reacts to motion and intensity of light. After dusk it is automatically switched on for 10 seconds (adjustable: 10 - 30 seconds) as soon as motion is detected. The lamp is suitable for outdoor use and can be installed on the wall

of a building. The two lamps can be adjusted separately and therefore allow for individual illumination. Power is supplied via batteries, there is no need for a power outlet.

FEATURES (LED220 011)

- battery-operated (batteries not included)
- battery life of 300 days (if activated 4 times per night for 10 seconds)
- low battery indicator
- the lamp is equipped with 3 control knobs for operation (TIME, SENS and LUX) which are located on the back of the motion detector:
 - TIME - the TIME control knob can be adjusted to control the length of time the light stays on when triggered by the PIR sensor (10 - 30 seconds)
 - SENS - the SENS control knob can be adjusted to control the range of the PIR sensor (0.30m - 9m)
 - LUX - the LUX control knob can be adjusted for the surrounding level of darkness needed to activate the PIR sensor (dawn - darkness)
- content: lamp, mounting accessories

TECHNICAL DATA

Point of use	outdoor use
Power supply	via battery: 1,5 V , 3 pieces
Battery type	C (Baby)
Type of lamps	light-emitting diodes (LED)
Lumen	400 Lm
Range	8 m
Coverage angle (PIR)	130 °

Material of product	plastic weather-resistant
Colour	black
Dimensions (width)	220 mm
Dimensions (height)	170 mm
Dimensions (depth)	170 mm
Packaging	carton
