Qi Wireless Charging Plate

for a comfortable charging

With this SCHWAIGER® charging plate devices with Qi standard or integrated induction plate can be charged effectively and safely by induction. An integrated status LED indicates the charging process. After a successful charging process, the charging

plate switches off automatically. Additional protection is provided by intelligent foreign object detection. This effectively prevents damage due to possible objects on the pallets.

designed by
SCHWAIGER

ARTICLE INFORMATION

Article Nr LIS200 533
EAN 4004005027600

Last updated: 04.09.2019

FEATURES (LIS200 533)

- wireless charging (Qi) up to 10 watt
- wireless charging (Qi) of your Apple® device up to 7,5 watt
