Modem Connection Cable

MiniD@t-Stecker > F-Quick-Stecker

This SCHWAIGER® antenna connection cable is suitable for antenna and cable TV systems. The angled connector on one end allows for using the cable with devices which are close to the wall. This cable is shielded twice and, thus, is less susceptible to any kind

of signal interference. The cable is used between the antenna socket and a receiver.

(MMC10 052)

- shielded twice for optimum protection against electromagnetic interference
- 90° angled connector shortens too long cable bendings and prevents the cable from breaking

TECHNICAL DATA

Material of product	plastic
Colour	white
Connections	1 x 90° angled Mini-Data-Connector 1 x F quick connector
Impedance	75 Ohm
Plugs	crimped
Cable design	0.8 mm (inner conductor) 3.2 mm (dielectric) 5 mm (sheath)
Shielding value	> 90 dB
Shielding	shielded twice
Shielding material	aluminium composite film/96-wire copper/tin braid
Inner conductor	CU
Cable length	1 m
packaging	polybag
