

LED Sensor Light with Motion Detector

This SCHWAIGER® LED sensor light one has to use no more light switch. The LED light is equipped with a PIR sensor and turns on when motion is detected. This light can be used in rooms where light is to be switched on automatically when entering. After 25 seconds

it switches off again automatically. It must be laid no extra power lines, because the LED light with PIR sensor is powered by batteries. The lamp has a bracket, which can be mounted on the wall as well as with the hanger bag freely suspended.
