## 2-Way SCART Changeover Switch (manual)

2 SCART jacks (1 1-pin.) > SCART plug (1 1-pin.)

This SCHWAIGER® SCART changeover switch is used to transfer audio and video signals of 2 playback devices to the TV. The manually-operated switch allows for connecting 2 devices to the TV. The cable is shielded twice, which guarantees mostly interference-free

signal transmission. In addition, this changeover switch is suitable for S-VHS.
