SAT IF Line Amplifier (20 dB)

This SCHWAIGER® line amplifier for satellite systems equalises attenuation when long connection cables are used. It also balances any loss occurring in star-wired distribution

systems. The amplifier allows for remote power supply via the input or the output.

FEATURES (SLV5060 221)

- remote power supply is possible via input or output
- attenuation equalisation for long connection cables
- Direct Current pass (DC)

TECHNICAL DATA

Connections (input)	1x F jack
Connections (output)	1x F jack
Output level (max.)	114 dB μ V (IM 3 DIN 45004 B)
Frequency range	950 - 2400 MHz
Loss	0 - 20 dB
Power consumption	12 - 18 V DC , 60 - 80 mA

Weight (set)	80 g
Dimensions (width)	92 mm
Dimensions (height)	29 mm
Dimensions (depth)	55 mm
packaging	sliding blister 2c
