Network Connector Socket (in-wall)

2 RJ45 jacks (8P8C)

This SCHWAIGER® network socket is used to establish a home network. The socket has the CAT 5e standard, is completely shielded and equipped with two separated RJ45 connections. Disconnecting devices from the network is easily done by pulling the network

connector. The socket was designed for in-wall installation. The wires can be securely connected with the included IDC simple tool.
