

USB hub, 4-ports

USB 2.0 A plug > USB 2.0 A jack

This SCHWAIGER® USB 2.0 Hub is designed to extend an USB connection to a total of 4 USB ports. Simply insert the plug into a suitable USB socket on the computer or laptop and there is enough space for up to 4 additional USB devices, such as USB sticks,

keyboard and mouse, charging cable or anything similar. In addition, each socket on the hub can be switched on and off separately with its own switch. The illuminated status LED shows you at a glance which sockets are currently active.
