## Multifeed Track System for 4 LNBs

height-adjustable in 6 steps

This SCHWAIGER® multifeed bracket is suitable for LNBs with a diameter of 40mm and allows for simultaneous reception of up to 4 satellite positions. Each bracket can be adjusted in height in 6 steps, which makes for height compensation of the elevation and,

thus, improved signal reception. In addition, the distance between the SAT positions can be as low as 3°.

## FEATURES (UHA104S 041)

- bracket height-adjustable in 6 levels to optimise the elevation signal
- adjustment of satellite positions with 3° spacing possible
- for simultaneous reception of max. 4 satellite positions

## TECHNICAL DATA

Quality	ULTIMATE
Version	adjustable e.g. for ASTRA (19.2° East), EUTELSAT (13° East), ASTRA 4A (5° East) and AMOS (4° West)
LNBS	4-way
Suitable for	SPI1250, SPI1000, SPI085Px series, SPI075Px series
Orbit distance	3°

Feed diameter	40 mm
Material of product	aluminium die cast
Dimensions (width)	370 mm
Dimensions (height)	107 mm
Colour	silver
Dimensions (depth)	30 mm
Packaging	polybag
