LED lamp with motion detector

This SCHWAIGER® LED lamp reacts to motion. Due to the high-quality PIR motion sensor, the light is being switched on exactly when it is needed - this saves battery power. The lamp can be installed on surfaces such as glass showcases, shelves or closets as well as

in the bathroom, the hall, the workshop or even in the garage. Power is supplied via batteries, there is no need for a power outlet.

FEATURES (VDLED2 532)

- ideal illumination due to extremely powerful LEDs
- swivelling
- mounting with screws or double-sided adhesive tape
- battery-operated
- batteries not included
- light modes
 - ON: permanent light
 - AUTO: light switches off after 25 seconds
 - OFF: no light
- dimensions of display (W x H x D): 250 x 280 x 260
- detection angle (horizontal: 100° / vertical: 60°)
- content of display: 12 pieces

TECHNICAL DATA

Type of lamps	light-emitting diodes (LED)
LEDs	8x LEDs
Lumen	15 Lm
Coverage angle (PIR)	100 °
Range	5 m
Operation time	15 h
Battery type	AA (Mignon)
Power supply	via battery: 1,5 V (3 pieces)
Material of product	plastic
Weight	83 g
Dimensions (width)	54 mm
Dimensions (height)	32 mm
Dimensions (depth)	163 mm
packaging	sealed blister SF
