DVB-T2 HD Indoor Antenna (active)

with built-in amplifier

This SCHWAIGER® indoor antenna is perfect for terrestrial reception of TV and radio stations and is equipped with a built-in amplifier (36 dB). Since the integration of LTE as standard for mobile internet, there have sometimes been problems with the reception

of digital terrestrial TV signals. For this reason, the antenna is equipped with an LTE band-stop filter which filters the LTE mobile telephony frequencies up to 790 MHz. This makes for trouble-free reception of DVB-T2 HD signals.

(ZA8960 011)

- built-in LTE band-stop filter for filtering LTE mobile telephony frequencies
 - swivelling and tiltable reception antenna, round shape
 - reception of digital TV stations
 - reception of digital radio stations (DAB+ and FM)
 - built-in amplifier is steplessly adjustable
 - connectivity options for looping through the existing home antenna or the cable junction
 - power supply is possible via external power supply unit (12V DC)
- content: antenna, power supply adapter (230 V AC)

TECHNICAL DATA

Quality	** Professional
Connections	1x IEC connector 1x IEC jack
Antenna gain	(max.) 36 dB (FM)
Cable length	1.2 m
Frequency range	47 - 790 MHz
Power supply	power supply adapter: 230 V AC external: 12 V DC
Power consumption	150 mA
Colour	black, silver
Dimensions (depth)	150 mm
Dimensions (height)	170 mm
Packaging	carton
