

Remote Control

for LED Light Bulbs

This SCHWAIGER® remote control is used to operate the HOME4YOU LED light bulbs. Depending on the functions of the individual light bulbs, this remote can be used to turn the light on or off or to adjust light intensity (brightness). In addition, it also offers the possi-

bility of adjusting the colour temperature, for example within the range of warm white to cold white, or the light colour. The remote control allows for operating up to 16 LED light bulbs, either individually or in groups.
